# TekBlend

Hits: 1,830

**Description:** TekBlend is a new Perl-based internet/intranet engine and template system for building dynamic customizable, scalable applications for the web. It leverages on the power of Perl and provides a platform for developing re-usable, component-oriented code. TekBlend helps you to create optimal structure for any internet/intranet applications with flexibility, reusability and accuracy in mind. System includes internal processing of input, cookies, and session management along with debugging tools. No need to include code in HTML document. Easy front and back end supportability.
