Data Grid

Hits: 3,181

Description: DataGrid is an active server component, which enables you to display, add, edit and delete a table record set in one page, using the power of DataGrid. Using DataGrid you can build a Web-based, browser independent, editable grid interface in no time. Works with Microsoft Access 97/2000 and Microsoft SQL Server 97/2000. IE+ and NS+ compatible.
