# Geo Redirect

Hits: 2,113

**Description:** Geo Redirect allows webmasters to redirect traffic to other locations, whether it is a different page of their site or an entirely different URL. Webmasters can redirect a web surfer by their IP, Internet Domain Name (.com, net, aol, etc.), and Country (.uk, .tw,.jp etc.) and you can also do partial matches such as (\*.dsl-ca.com). Geo Redirect simple user interface makes creating redirects for your traffic a snap. Geo Redirect is more than just a redirection program. It also provides webmasters with a web based stats program.

| Resource Specifications |                |
