# refererLib.php

Hits: 2,289

**Description:** RefererLib lets you log where people came from to get to your site. It lets you list either most recent or most frequent. You can choose to list either referers specific to the current page or common to all pages. You can configure the list length. You can set up a list of URLs to ignore, and you can turn on a check back function that will eliminate referer spam. Comes with easy install instructions.
