## Get Detailed Information About Your Site Hits: 1,381 Visitors In Real Time using ASP.NET

**Description:** Have you ever wanted to see who is viewing your web site in real time? how many of them are there? what browser they are using? where have they come from? what are their host addresses and host names? and exactly what pages they have read? all in detail? In this article we build an ASP.NET application to do exactly that.

### Resource Specifications
