# WATemplate

Hits: 3,662

**Description:** WATemplate allows the ASP programmer to significantly improve the quality of their applications, by enabling the 100% separation of HTML and ASP code. This model aids the development of bug-free applications and enables more efficient maintenance. Features: Value replacement in templates; 'Load Once' value replacement in templates; Conditional template sections. Available immediately as a free download, complete with comprehensive manual and samples.
