STAY AWAY!!

They take your money and do not give any help at all.

To all of you interested in this product PLEASE reconsider! Their support and upgrade is unacceptable! Software was downloaded and installed as instructed! It was missing image files and a couple paths were wrong as well! (OK No big deal) went into code and took files from a downloaded version of osCommerce and modified code as needed! BUT guess what try to get support or the Upgrade that is promised to the latest and greatest 3.0 and no one is around! Guess its called take your money and run! REMEMBER "Buyer beware" and you have been warned!
