HTML Block Scroller & Marquee

Hits: 17,317

Description: This program animates any number of HTML block-level elements of any pixel size. Scroll HTML blocks up, down, left or right! After a specified amount of time, the next block is slid in to replace the old block. Scrolling will also pause when the mouse cursor is placed over the block. Great for showing a lot of content in a small space, or a rotating banner. Created with simple and reusable code in mind. Have any number of separate block scrollers running on a single page all using the same javascript.

Version 2 is now compatible with the text/xml and application/xhtml+xml mime types!

Resource Specifications	
Version:	2.0
Platform(s):	linux, windows, freebsd, osx, sun
Price:	Free (GPL)
Date Added:	Jan 10th, 2003
Last Updated:	Apr 16th, 2008
