Chat-N-Time

Hits: 18,119

Description: Chat-N-Time is a simple Perl real-time chat CGI script for the Web. It lets you hold real-time conversations on a web page, complete with "/me" for emote actions, "/msg" for semi-private messaging, and "/yell" for when you're just feeling rowdy. You can log all chats to a transcript file, play a sound when someone enters, see who's online, etc.

Resource Specifications
