Flash-Ticker

Hits: 3,772

Description: Flash-Ticker is a ticker add-on for PHP-Nuke sites. It is designed to put everywhere in your Nuke site a ticker message with a flash movie. An admin page allows you to change the message when you want, linking it to an URL. All previous messages are stored in a text file with hour and date when they were made.

Flash-Ticker is now accessible (WAI) with an alternate text message for text browser.

Resource Specifications

Version:	1.0.1
Platform(s):	Linux, Windows
