Question & answer

Hits: 3,902

Description: Have scientists answer peoples questions for instance. This is a heavily dynamic application based on access 2002 db. You can easily change it to fit your personal needs. Enjoy dynamic drop down boxes, ability to search questions & answers, advanced sql queries with loads of inner join, adminfunctions, client and server-side validation, email control, javascript with mouseover effects. It's ready to go, just extract and run it. Site design inspired by the microsoft.com style.
