FileTrack

Hits: 3,159

Description: FileTrack is a secure database-driven software for distributing files across the internet. Targeted mainly towards internet developers and business owners, our powerful system allows private, individual login accounts to be created for each user. Files can then be uploaded and categorized for quick access.

File Track is Great!, Mar 4th, 2003

Reviewed By: Yamill

Filetrack has released the new version 1.1.0! It is better than the first version. The new version comes with more organization and more mods for the pro version. This new release is great. Filetrack will expand and become a very popular client management system. Im looking forward for this.
