## MnM Stats

Hits: 12,247

**Description:** MnM Stats is a Web Site Statistics Program that records data on to a database based on the visitors system information and where they came from. It then displays it on to a well organized structure such as graphs and lists represented by bars and percentages, showing you the visitors currently visiting your web site (pin pointing exactly where they are); the latest visitors; where they came from; their system information such as OS, Browser and Hostname.
