## NOP free cart

Hits: 17,709

**Description:** Have you ever wanted to put up a simple store front, but not had CGI access to do it, or wish to lower your server overhead? Then this free JavaScript shopping cart is exactly what you need. Every browser supports JavaScript these days, and with the use of NOSCRIPT tags, those very few who have turned it off are alerted to re-enable it during the duration of their shopping experience. Also features the ability to have your products on many pages -- you do not have to have all of your products on one page, like so many of the other solutions. All that is required is pasting in the source code on every page that you can purchase products from, and on the final checkout page.

### Resource Specifications

**This Is The Best And Easiest Shopping Cart Program Out There.**, Jun 1st, 2005

Reviewed By: boxofdeath

I have been looking for an easy and great shopping cart software for over three years and i have just found one, and this NOPCART is the one. It is simple to install. all you have to do is defin the perl location and define a few variables like email and your name. that is it. and it is installed onto your server. NOPCART has a great team and a desecussion form that will help you. they also have great people like WebRecka from Echelon Design <http://www.echelondesign.net/> that have their own support for you. they will answer your questions for free as soon as possible often within one day! this is the best well rounded script out there.

**Best Shopping Cart Ever!!!**, Nov 14th, 2005

After a year of searching, this is the best and most customizable shopping cart of all, and shockingly, it's free!

Once you figure out how it all goes together (not that hard), it's quite amazing.
