Professional PHP4 Web Development Solutions

Hits: 1,015

Description: The true power of PHP lies in its strength to create dynamic web content. Developers have moved on from using the newbie style of PHP books, to making PHP work for them by using the theoretical offerings to create small to medium websites. This transition has created a definite information void, and through the Professional PHP4 Web Development Solutions book we hope to exactly fill that space - by helping you create a variety of real world, interactive web sites using PHP4 along with HTML, a DBMS system (MySQL), PEAR::DB, and XML or WML wherever applicable.
