iTab by Cool Focus

Hits: 1,667

Description: iTab is a tab control in the Windows style, designed for use with the HTML IFRAME. The result is a smart and intuitive interface that makes it easy to browse between related web pages. Along with full control over color scheme, fonts and color-reactivity, iTab includes our PageSync feature which can be used to ensure that the iTab control will always select the correct tab when the user clicks a link in a framed page or uses the browser's Back button.

Resource Specifications

Version:	2.51
Price:	GBP 15.00
