Flawless Script!, Oct 13th, 2006

This is an amazing script. I came across it while looking for something else and it turned out to be even better than what I was looking for.

The script is easy to use, just copy and paste.

It could use some explanatory troubleshooting though. Mine didn't work until I re-configured some things about the page I put it on, but other than that it is absolutely flawless and you don't even have to download anything.
