Basic Photo Album

Hits: 21,196

Description: Handles numerous photo albums with one instance of the script. Uses a user-defined template to match your site with an easy, online interface for customization. Many adjustable settings including font color, caption color, font size, thumbnail size, etc. Simply upload the script, upload your photos, and run the configuration editor in your web browser. This is an upgrade of the previous version of BPA. This is not a fancy image gallery, it is meant to show your pictures while attempting to match your site. This is for people who don't want all the extra "stuff".

2.1 Fixes: Allows non-image files to be in the album directories.
