PHP Form Validation Pack

Hits: 4,932

Description: VDaemon Extension gives Macromedia Dreamweaver MX users unique possibility to incorporate form user input validation code into php pages in quick, easy and effective manner - no PHP knowlege required to create typical form validation! On other hand VDaemon Extension makes skilled PHP developers free to create advanced validation solutions. Extension functionality is based on popular VDaemon free php library.

VDaemon Extension feachures:

- easily incorporate VDaemon validation into existing web sites
- supports both client and server-side validation
- all common types of validation (required fields, field type, range, compare, regexp, e-mail, custom)
- allows you to completely customize how error information is displayed to the user
