## ASP.NET Auto Email 3.0 - Incredible email & DB forms without programming!

Hits: 6,571

**Description:** ASP.NET Auto Email 3.0 allows you to create incredible ASP.NET email and database forms the easy way with over 40 features and no programming required! Automatic form-to-email, simple form-to-db, dynamic file uploading, personalized auto responses, import form data into MS Excel or Access, attachment compression, and much more. ASP.NET Auto Email works with all versions of ASP.NET. No SMTP components, no messing around with complicated "configuration files", and no installing email "delivery services." Customers in over a dozen countries depend on Auto Email! We now have a specific Form-to-Database product available as well.
