# SWFKit

Hits: 954

**Description:** SWFKit is a tool to create s32-bit Windows applications from flash. SWFKit is based on FFish script(a script language similar to ActionScript and Javascript),which is powerful but simple. With SWFkit, your applications can: access databases, realtime communication by socket, send and receive email, read and write file, access system registry, play and record multimedia , embed ActiveX control,etc.
