tdSearch

Hits: 6,775

Description: tdSearch is a PHP MySQL boolean search script that displays results from your MySQL database table. You can use and (+), or (?), not (-) to perform boolean searches, use double quotes to search for a phrase, or use a combination of both. This script does not index sites or create database tables. Minimum requirements: PHP 4.1.2+, MySQL 3.23.47+, CSS.
