DWmail

Hits: 21,808

Description: DWmail is an 'intelligent' Web based email application. It allows you to access, manage and send email using any POP3 or IMAP4 email account. Simply enter your email address and password to check your email.

Fully supports MIME and HTML based email, attachments, IMAP folders, reply, forward, compose and delete. DWmail also supports reading and sending embedded HTML image attachments.

Includes calendar, addressbook, notes, spellchecker, aliases, iCalendar, threading, folder management, external email retrieval, Trash, Sent Mail, WYSIWYG HTML editor, language independent template skinning, read receipts, drafts, moving messages, auto-previewing attached images, signatures, user preferences, message importance, flood checking, RSS reader, maximum recipients per email and saving messages to your local computer. Includes AJAX, background checking for new messages and addressbook auto-complete for composing emails.

Supports both MySQL and PostgreSQL database backends.

Great webmail, Jan 7th, 2005

Reviewed By: adeslas

DWMail is without any doubt one of the best webmail systems I've come across. It is easy to install with only a few needed parameters to setup and it works! It doesn't only work, it works FAST! Even without a database. Customization is a bit cumbersome but you can change most things to your liking. Of all the webmail systems I've tested (well-known ones and less obvious ones) this one is by far a winner. If your looking for a fast and easy webmail for your shared (limited) hosting, take a look at this one, you'll be surprised! The \$38 is well worth it.

Great Webmail Product, Bad Support, May 28th, 2008

Reviewed By: TAK

I have to say that DWMail is one of the first Webmail programs that I enjoy using. It was pretty straight forward to get setup, and there are TONS of options to customize it exactly as you want it.

The only downside right now is customer support. There are NO responses to tickets. This has become extremely frustrating as I need my licenses modified and after 2 months this simply request has still yet to be resolved.

Overall, 3/5. All points lost on support.
