Good for fast making flash menus. It contains about 40 kinds of rectangular buttons 126x23 pixels (you can't change dimensions of your buttons). You have choose only two hardware fonts (_sans, _serif) - that's bad. You can group it in columns and rows -that's good. Finally this program is very good to make fast animated, simply menu but you can't except from it any advanced functions. The plus is that you can do menu in about 3 minutes and get ready SWF or HTML document.
