## Free ASP Upload

Hits: 23,422

**Description:** Upload files to your server from any browser. FAST, flexible, and free. This script will make it very easy for you to add upload forms to your web site. Even better: you will be able to do it without having to buy an expensive binary upload component. Besides cost, binary components also require special server permissions. With source code you can add it easily, even to a web-hosting account with restrictive access permissions.

### **EXCELLENT ASP UPLOAD**, Feb 5th, 2005

Reviewed By: jmanalili

It took me days to research for an upload script, ASP or CGI script and found no success in the process. But when I get the script here, it works smoothly... I don't want to waste my time searching for another script.

### **Easy to use and does what it says!**, Jun 14th, 2006

Reviewed By: jrbryant

I've spent hours pouring over scripts to upload files. Having tried out over 15 different scripts... this is the easiest to install and use. The clear instructions make it exceedingly simple to get up and running in a matter of minutes. Source code is clean and easy to understand and make changes to. Works like a charm!
