SkWHOIS ActiveX Control

Hits: 1,415

Description: SkWHOIS ActiveX Control is a powerful, intelligent, flexible, and lightweight WHOIS ActiveX control. It allows developers to integrate the WHOIS/NICNAME protocol message sending capability into their applications. SkWHOIS ActiveX Control can be used to retrieve information about a specific domain, such as the registrant's company name, address, or contact information. In Autodetect mode it can intelligently query the right remote database based on the query type (host IP address, host name, or domain name) and on the corresponding designated WHOIS server.

Resource Specifications

Version:	4.0
Platform(s):	WIndows
Price:	\$295
