## superPopup Generator

Hits: 8,201

**Description:** This online tool will create the JavaScript code necessary to create a wide variety of styles of Popups and Popunders without any need to understand how to program JavaScript. All the usual customizable window features are included popup (infront/inback, size, position, method of opening, etc) along with full cookie function to control PopUp frequency. In addition to this there are new close window functions - including timed delay close.
