TECAImage

Hits: 11,386

Description: TECAImage is a simple but yet powerful image gallery tool. It generate thumbnails of images inside a particular folder (and sub-folders) and show them in an organized way. TECAImage is very easy to install, just unzip the package under your image folder! To populate your image gallery, you just need to upload your image files and organize them in folders and sub-folders.

I find it very helpful in sharing photos on the net with my friends and family. Previously, I needed to use IrfanView to generate various HTML files and then upload the images, thumbnails and HTML files to my site... Now, only the photos!! Cool!!

And the "powered by TECAZONE" link is MUCH smaller than IrfanView, so I decide to keep it. Credit for the developer!!
