X-Cart PRO

Hits: 10,458

Description: The solution for online marketplaces and supermarkets, X-Cart PRO was designed to enable multiple vendors to offer their products in the online storefront. Recommended for companies running multi-vendor online stores and companies willing to offer a place in their online store for third party businesses. No programming knowledge is required to setup&use X-Cart PRO. Simple web based interface allows you and your vendors to manage the system using separated accounts from any computer with internet connection.

The software is fully customizable as it is template based and comes with open source code.

We had a complex set of needs, and after quite a bit of evaluation of the various products available, we settled on X-Cart Pro. The software has unbelievably good features, but perhaps the best part of our X-Cart experience has been the service we have gotten from the X-Cart team. They always ensure that they understand fully the nature of our requests, and then execute a solution to our liking. They have consistently done this over an unusually long development period, and we are grateful.
