Look, this is how it is. This software is fantastic, the support is top class and I would highly recommend this product to anyone thinking of using a shopping cart system on their website. I waited over 1 year to be able to afford the quality that JShop have produced in JShop Server. Proof of the pudding can be found in many sites who have taken on the JShop Server Software, see thier store examples: http://www.jshop.co.uk/examples_jss.php. Our company, E-teas, www.e-teas.co.uk, has used JShop Server since two months and we love! Thanks for all the support JShop.

Since upgrading to JSHOP Server in May 2003 we have seen a marked improvement with our site, we now have the functionality of the "Big" sites for a fraction of the cost. The site is much easier to manage now, and has reduced our overall site maintenance by around 50% Most impressive of all is our search engine rankings, especially in Google. For most products that we sell we are now top page, or very close after. JSHOP server seems to take search engines bots by the hand and guide them around!!!
