ProductCart Build To Order

Hits: 7,568

Description: A truly unique ecommerce system that combines a shopping cart, product configurator and online quoting system. It's the ideal solution for selling configurable products and services. Perfect for custom computer builders, Web hosting providers, catering, printing services, consulting, industrial machinery, etc. The quoting module allows customers to save, print, edit, or submit a quote. Quotes can be turned into orders with one click. Parts of a configurable product or service (e.g. the hard disk of a custom desktop computer) can be sold on the store as stand alone, or only made available as part of the configurable product. Conflict management system allows you to create rules such as "if you select A, you cannot select B" etc. Selections that are in conflict with each other are automatically grayed out on the product configuration page. A truly powerful system to sell complex products and services online. New version 3 contains many new features and performance improvements.

ProductCart Shopping Cart, Aug 7th, 2007

Reviewed By: bzdeveloper

I've been using ProductCart shopping cart for almost 3 years now. I haven't left it because:

- 1) It has more features than almost any other cart available.
- 2) it's easy to use, highly customizable
- 3) The customer support is absolutely incredible. Can't honestly say enough about how helpful these guys have been.

Great ASP Shopping Cart!, Mar 6th, 2008

Reviewed By: toywonders

I spent about 6 months evaluating shopping carts. If you sell on the internet, this is one of the best carts in the industry. Our company has been using it for just over 2.5 years and have zero regrets. The few issues that came up were resolved very quickly. Their support staff has even worked on a few matters that went beyond my expectations. Key features that I sought in a cart: full source code, asp programming language, sql database support, UPS/FedEx freight quotation on the file and
