Hits: 724

Description: A new data encryption program that allows Internet and especially Intranet (office network users) alike, the ability to encrypt, decrypt, send, and receive any type of data, whether it be word docs, PDFs, images or programs. Whatever is meant to get to the intended individual, you can be assured it will be for their eyes and their eyes only. Note: A single user encompasses 2 work stations

For Business Networks you need to purchase additional stations licenses. Multiple Licenses are available in groups at a discount.

Resource Specifications
