Description: FINALLY....our popular HTML encryption service is now available as a stand alone program. It is enhanced even beyond our original service to incorporate the next evolution of protection for all your HTML code, Javascript and even meta tags, its your choice. You can protect everything in your web pages, HTML source code, JavaScript code, VBScript code, Text, Links, Graphics, addresses. Our new Image Splicer will cut up your images and keep the original with you. After protection, all your pages source code can neither be read nor edited; your text cannot be copied to clipboard or printed on a local printer; your link addresses will not be display in the status bar of their browser; and your graphics cannot be saved to a local disk using "Save Image As"...and much more "

This can't stop them, Jun 23rd, 2003

Reviewed By: dejiolowe

I went to the website and couldn't right click as advertise. But went ahead to 'Save As..' as web page. right clicked the document and click 'Edit with...' and chose the venerable old notepad.exe. Come and see the whole code exposed! It is a shame that it can't even protect their own site and why should it protect mine?
