Aardvark Topsites PHP

Hits: 40,819

Description: Aardvark Topsites PHP is the premier free PHP/MySQL topsites script. Aardvark Topsites PHP has all the features you will ever need. Members' ranks can be shown on their button. There are 6 different ranking methods, including pageviews. Powerful anticheating protection is included. It supports categories. You can use up/down/neutral arrows. The admin allows you to approve new members, edit existing members, delete bad members, and much more. Google-friendly links give sites more incentive to join. It's free, so download it and try it today.

Aardvark Topsites, Sep 1st, 2003

Reviewed By: ChrisA

Great Top sites script, with some excellent support on the forums.

I had used his old cgi version, but now run two lists from this php version which is really easy to set up and install and modify the look and feel for you site.

I have tried other topsite lists in the past but this is definetley the best I've used.

Finest Topsite Script, Feb 2nd, 2007

After trying out pretty much all the PHP topsite scripts (free and paid) I easily settled on Aardvark as the best. Easy templating, clean, easy to edit code, feature rich, easy install, great support etc. The latest version (5.x) has some amazing SEO that has skyrocketd my topsite SERP's above everyone. Hats off to Jeremy for his creation, this truly is a powerful and user friendly script right out of the box.
