A friend of mine recommended this when I needed a new design for a website. Since they have great looking designs I was very curious and decided to give it a try.

I was very pleased that the source files (like PSD, FLA) were included ! For an average price of 30 - 50 dollars you get a great design, complete with sourcefiles. You can't create a site yourself for that money !

Really, don't be a thief of your own money, just check it out. I never thought it would be this good guys ...

Great website, Jul 16th, 2003

hi all,

We have bought several templates from templatesshop and we are very supprised.

After making up our minds, we decided to buy our first template, we paid and within a hour we got a email back with a download link.

They supplied the following in our Zipfile:

PSD, HTML, JPG, Fonts, Logo.

The PSD file was very easy to edit.

We where convince that templatesshop was going to help us save time, we want thank them and recommend them to you.
