idreams guestbook server

Hits: 4,097

Description: The i-dreams.net guestbook server allows you to start a professional and secure guestbook service with a guestbook, that fulfills one's every wish. The administration pleases with clear structure and many functions. Some of the main functions are: clear user administration, sort and search, mailing list, guestbook profiles, permission profiles, main configs, guestbook configs, advertisement profiles and specific category ads, click consideration, FAQ, announcements, skins, language files, SSI/PHP/JS statistic functions, own fields, automated tasks, step by step registration, password reminder, own templates, perl code implementation and many more... To make the guestbook and guestbook server functions safe, the script uses session ids, spam filter, e-mail verification, hidden codes, image verification and the "guard". In consequence of using the guestbook with the same name as a basis, this guestbook has many functions which make the usage interactive, safe and usable by everyone!
