I work mainly with PHP scripts, however, I stumbled on to this pearl/cgi script and found it to be very easy to install, well written and professional looking! I highly recommend this script!

This is a very good image program. Very easy to setup, user-friendly, and support staff is very wonderful. I would definably recommend this to anyone! The only thing missing is the ability to see how many people have visited which image. But other than than, this is very good.
