## DWebPro - Get Your Web Site On CD/DVD

Hits: 7,515

**Description:** Have you ever wanted to distribute your dynamic web site on a CD or DVD and didn't think it was possible? DWebPro is a software developed for distributing dynamic web sites on CDs/DVDs and install packages without needing to rewrite the web site code.

DWebPro supports more database (MySQL, Firebird, PostgreSQL, SQLite, HSQLDB, Microsoft Access, Microsoft SQL Server 2000, 2005, CE, Oracle XE) and server side languages (PHP, Perl, Python, Ruby, Rebol, DWS II, ASP Classic 3.0, ASP.NET, JSP/Servlet, Zope, Railo (CFML Engine), ColdFusion) than any other product on the market. With DWebPro you can make a copy of an e-commerce website for distribution to clients (like osCommerce) or a copy of the e-learning courses built on the web-based platforms, such as Moodle. Software vendors can use it to create install packages and convert their web applications into standard Windows ones even with trial limitations (number of starts, days and time of execution).

It's FREE for non-commercial use!

### Resource Specifications

<b>Version:</b>	6.8.1
<b>Platform(s):</b>	windows
<b>Price:</b>	From 299 €
<b>Date Added:</b>	Jul 30th, 2003
<b>Last Updated:</b>	Nov 21st, 2007
<b>Author:</b>	Creative Park - Filippo Toso
