Web Page Maker

Hits: 1,812

Description: Web Page Maker is an easy-to-use web page design tool that allows you to create and upload a professional web page in minutes without having to know HTML. Simply add text, images, photos, animation, navigation bar, flash, buttons, logos, and more onto web page and move them freely.

It offers several pre-designed templates, so you can create a new web page from them.

You can export your page to HTML, and then upload your web pages to the Internet automatically by clicking a publish button.

Resource Specifications
