# Happy Pop-out Menus

Hits: 2,699

**Description:** These are pop-out java menu applets available in numerous themes and suitable for a side bar navigation layout with the menu down the side of your page. Includes configuration tool. Support for true-type fonts, multiple event triggers, user-defined icons, and more. The menus have pop-up submenus, which can pop up over anything on your page - e.g. frame edges, HTML content, flash movies, etc - but are easily removed again afterwards.

## Resource Specifications

<b>Version:</b>	1.11
<b>Platform(s):</b>	All
