I found this search engine software to be perfect for what I needed. It even taught me some things about search, like don't stuff the keyword meta tags or expect false positives. Can anyone say "Supplemental results" in Google.

The Pros:

If your website is under 50 pages the software is free! If you're like me, soon as I go over 50 pages, it's a sale! There's just too much neat stuff like tracking searches for new content development.

The cons: none
