Online Classrooms for Teachers

Hits: 4,772

Description: Using your ADMIN control panel, you will have the ability to control 100% of your website. You DO NOT need to know HTML to have the best looking website! Each one of your pages can be different using our selection of pre-made pages.

You will also have the ability to create unique pages for each student. The student and parent can login using their username and password and review any comments that the teacher has added for that student. The parent will also have the option to leave the teacher a quick note, and the teacher can reply to that note as well.

The site is a very nice tool for teachers to have a professional website that is EASY to update and also allows for excellent communications between the teacher, students and parents.

Making changes only takes a few minutes! No need to spend hours and hours editing and updating your website.
