Whiz-Mail

Hits: 2,968

Description: Whiz-Mail is a remotely hosted form-submission service to process and validate form submissions. Let us host your forms on our SSL server to provide maximum security, keep forms on your server and process them through Whiz-Mail or create Forms online using an intuitive Form Wizard. Powerup any Form using Autoresponders (plus Followup Sequences), Trigger E-Mails, Military-strength Encryption (with 1-click decryption), Online Database Browser, Export Functionality, Newsletter Tool, vCard Generator, Online Graphs and many more features. Manage your submission database and assign view/modify/approve record/decline record rights to colleagues or customer(s). Allow your visitors to manage their records online. Receive attachments of up to 8MB in size. All features are well documented using narrated flash animations and an intuitive Help Center.
