Menu Design Guide

Hits: 1,440

Description: The decision about the navigation you will use for your website or application is one of the most important you will make. Web site award systems always include "navigation" as one of the prime assessment categories. The length of time spent by a visitor on your website, and the comfort they experience while there, is significantly determined by your menus. This menu design guide is designed to help you in the conceptualisation phase of your planning and brings many factors to your attention which you may never have thought of. Choosing a menu? Read these articles first!
