WSN Gallery

Hits: 6,178

Description: WSN Gallery can handle images, videos (with integrated flash player) or other media. It offers unlimited custom fields, image resizing, FTP and tar upload options, slideshows, and numerous SEO options. Monetize the gallery with sponsorship. Use the member integration and personal albums to turn it into an add-on area for a forum. Translate into any language. Use the RSS features to import flickr albums.

Reviewed By: apokryphos

Without a doubt the most comprehensive, advanced, and most easily customizable gallery script on the market. Does much more need to be said?

Includes features like an online listing (with the viewer's location), full Private Message system, Comment system, precise search feature, Toplists (God's gift to customizing), pacey loading of images/thumbnails, many visual affects available, and of course an FTP import to practically instantly bulk load images to the gallery.

The target market for this was originally webmasters (because of the extent of its customizability), but it's also perfect for those quite ignorant of HTML and PHP altogether. Also integrates perfectly with the other WSN scripts, including WSNForum.
