I got this and tried to install. It would not work. The installer is flawed, fails to write to config files and basically just not worth messing with.

It is easy to install and fullfills the needs of 40 000 Users, Jun 25th, 2005

You made only the mistake, that you didn't set the configure.php's to writable status with `chmod 777`, so xt:Commerce wasn't able to install or to write files.
