Jetbox CMS

Hits: 62,998

Description: Jetbox CMS simple to use and has a professional intuitive interface. Its role based, has workflow , module orientated, XHTML comp., weblog and RSS, mailing list. It provides all the flexibility to create a custom website for you client or for your personal use, without the standard Portal look and feel.

Two video tutorials make an easy start;

The introduction tutorial shows how to install Jetbox with the wizard and the basics about content publishing with the integrated workflow features. (32 minutes)

The admin tutorial shows you how to create new administration sections with the integrated generator and how to add new sections to your website. In just 17 minutes you see; how to create two new administration section (and creating the database tables); one for books and one for book categories. And how to add the new book section to the website and customize the way it's displayed by editing the generated html templates.
