JavaScript Popup

Hits: 7,519

Description: No plain Windows popups, this tool will allow you to easily create DHTML/JavaScript popups that can be personalised to fit in with your web site design. Customize every aspect of the popups and use your own color scheme. Give your pages a more interactive feel. Create popup forms, popup help boxes, popup messages, make large images popup from thumbnails. Use Internet Explorer transition effects such as fading in and out. Full detailed documentation and email support is provided.

Resource Specifications

Version:	1.0
