# JPG Navigator CGI

Hits: 1,146

**Description:** This Perl CGI allows users to view categorized jpeg image libraries using its dynamic interactive navigation engine. It creates thumbnail images for you with very little effort on your part. Users select from a list of categories generated on the fly and are presented with a tableized view of images to choose from. When the user clicks on an image, they are presented with the full size image.

## Resource Specifications

<b>Price:</b>	\$800
<b>Date Added:</b>	Nov 3rd, 1999
<b>Last Updated:</b>	Nov 3rd, 1999
