## smc WebMall (Hosted)

Hits: 2,977

**Description:** smc WebMall provides you with a means to design your own web "mall" community with a style and design that is unique to your own imagination. Shoppers will be able to enter your mall front, login to an existing account, browse categories you have provided and shop in multiple stores, while maintaining ONE "mall" cart. After your customers have completed their shopping, they can return to their own password-protected area to view past order history, and check status on multiple purchases from various merchants. Prospective merchants for your mall can build their own store account online and manage a password-protected merchant area providing sales statistics, hit counters and more. Includes free real-time credit card processing option for each merchant. Free 30 Day Trial

### Resource Specifications
